

Manually clean your press, auxiliaries and hands with great performance and easy handling

CleanPac™ - All contained in one compact package

Baldwin **CleanPac™** consumable product range consists of three different products, **CleanPac™ Press**, **CleanPac™ Dry** and **CleanPac™ Hand**. These are pre-perforated sheets positioned as an easy to use disposable alternative to conventional rags and solvent used for manual cleaning at most printers.

CleanPac™ Press is a pre-impregnated sheet designed for any cleaning in the press such as frames, blankets or any other parts in need of manual cleaning from time to time.

CleanPac™ Dry is dry sheets for wiping of solvent, ink etc.

CleanPac™ Hand is sheets impregnated with a gentle but yet effective re-moisturizing hand cleaning solution for removing ink and dirt after any job in the press.

All of these products come in package that is compact and easy to use as well as to dispose after the last sheet is used. With the **CleanPac™** product line any printer could save as much as 30% compared to using rags and solvent. The **CleanPac™** products are environmentally friendly and can be disposed of as normal waste.

- Compact packaging

CleanPac™

CleanPac™ in technical terms

CleanPac™ Press is a pre-impregnated sheet designed for any cleaning in the press such as frames, blankets or any other part in need of manual cleaning. **CleanPac™ Press** uses an environmentally friendly cleaning agent that is Fogra approved and meet all health and safety regulations. The correct amount of solvent is added to ensure that an optimal amount of cleaning agent is use reducing the overall solvent consumption.

CleanPac™ Dry is dry sheets for wiping of solvent, ink etc. The **CleanPac™ Dry** sheets are made of nonwoven material that is non linting and with high absorption capacity.

CleanPac™ Hand is sheets impregnated with a gentle but yet effective re-moisturizing hand cleaning solution for removing ink and dirt after any job in the press.
